## The City of Wetaskiwin Extends a Most Heartily

The financial position of the City and its surrounding districts are in a remarkably strong condition as compared with other parts of the Province. Sales of property and tax collections, revenue from rents and other sources have exceeded other years and expectations.

The debenture debt of the City which some years ago amounted to approximately \$500,000, has now been reduced to \$150,000 if we allow for the \$38,000 special trust savings account and unsold debentures which the City is taking up itself.

A larger reduction would have been made in the City's indebtedness but for the construction of a new up-to-date Community Hospital shared in by the surrounding Municipal Districts and for the large new Skating Arena completed this last winter. Tourist visitors have been loud in praise of the beautiful Memorial Park on which a great deal of work has been spent.

It contains the Cross of Sacrifice in memory of those from Wetaskiwin who fell in the Great War and only the other day a beautiful memorial set in a rock garden was unveiled in the presence of His Honour the Lieutenant-Governor and His Honour Judge J. W. Howay of the Historic Sites and Monuments Board.

From an industrial point of view six large capacity grain elevators are kept busy and the MacEachern Milling Company's plant supplies the finest grade flour to points far and near. Two large creameries handle the products of the dairy herds in the district, while the stock market in hogs and cattle is noted for the high quality of the animals passing through it from Wetaskiwin.

The farms surrounding the

Wetaskiwin "The Hills of Peace."

From time immemorial the Cree and Blackfeet nations had been implacable enemies. As the buffalo migrated northward the Blackfeet crossed the Red Deer river into Cree territory, thus causing a constant state of warfare between the two tribes.

Late in the year 1867 the hostile tribes prepared for battle. One night the Blackfeet planned a surprise attack and Buffalo Child, their young chief, was chosen to spy out the enemy position. But Little Bear, the Cree's youthful chief, was at the very same hour also reconnoitering. The two, cautiously creeping up opposite sides of the same hill, came suddenly face to face.

For a minute the two pictur-

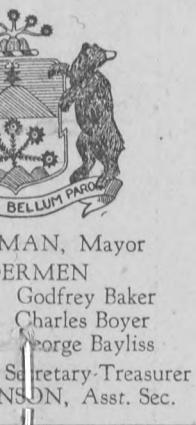

esque savages, lusting for each other's blood, faced each other—and then like two great cats, sprang and grappled together. But so evenly were they matched that after an hour's titanic struggle, they must need's desist from sheer exhaustion.

As they squatted opposite each other the Blackfoot Chief drew forth his pipe—but alas the Cree's pipe had been shattered in the fray. So Buffalo Child tortured his swarthy rival by contentedly puffing fragrant odors of "kinnikinnic" at Little Bear. To further tantalize him he held out his smoking pipe toward his agonized rival. But the Cree, like lightning flash, snatched the pipe—and drew deep into his tortured lungs the soothing draft.

With startled consternation they suddenly realized that they had smoked the common pipe—the Pipe of Peace!

Dejected and bedraggled the two warriors reported to the

# Discovery . . .

**M**ANY YEARS AGO the natives crossing the veldt in South Africa picked up some bright stones which attracted attention by their brilliance and colors, and eventually these stones came to the notice of the white men, who at once recognized them as diamonds. This led to the discovery of the great Diamond Fields of South Africa, a discovery which has brought millions in treasure to the coffers of the civilized world.

Gold, oil and minerals of all kinds have been discovered quite recently right in our own Canadian West, and the wringing of this wealth from the earth brings prosperity and comfort to many thousands of our neighbors.

Some discoveries are made accidentally, but more are the result of PATIENT EFFORT and HARD UNREMITTING TOIL.

tribes what they had unwittingly done. But so strong is Indian tradition, all accepted the event as a special omen from "Manitou." Vows of eternal friendship

# “Brass Tacks”

**A** GOOD many years ago, most merchants used to “yard off” a length of cloth by estimating a yard as the distance from the tip of their nose to the extremity of an outstretched arm—or by some equally haphazard system.

No doubt some customers may have noticed that certain merchants have shorter arms (or longer noses) than others, and felt vaguely that something was wrong; but nobody did much about it until one bright merchant hammered two Brass Tacks into his counter, exactly 36 inches apart, and thereafter measured his cloth on them—ACCURATELY. Soon all merchants followed suit—customers insisting that they “get down to brass tacks” in their measuring. That is how the expression started.

**EATON'S** Catalogue “gets down to brass tacks” in describing its merchandise. There's nothing vague—nothing uncertain—nothing that can be “taken two ways.” If an article's all wool, we say so—if it isn't, we admit it. Always, you KNOW what you're getting. Accurate illustration and precise information tells exactly the value you'll receive for the money you send—and, of course, it's our aim to make that value the best you can obtain anywhere. But in any case, you KNOW what you're getting—experience has taught you long ago that “It's SAFE to save at **EATON'S**.”
